

AYDT Registration Admin Portal

Project Context Reference

For UI brainstorming with AI assistants

AYDT Registration Admin Portal -- Project Context

Use this document to understand the full scope of this project when brainstorming UI layout ideas.

What This Project Is

AYDT Registration Admin Portal is a dual-portal SaaS platform for managing dance studio operations.

- Admin Portal -- Studio staff manage semesters, classes, sessions, email broadcasts, payments, dancers, and families
- User Portal -- Families browse programs, add sessions to cart, register dancers, and complete payment

Tech Stack

Layer	Technology
Framework	Next.js 16 (App Router) + React 19
Language	TypeScript 5
Styling	Tailwind CSS 4 + SCSS
Icons	lucide-react
Forms	React Hook Form + Zod
Rich Text	TipTap (ProseMirror)
State	React Context + useReducer (no Redux)
Database	PostgreSQL via Supabase
Auth	Supabase Auth (magic links)
Storage	Supabase Storage
Email	Resend API
SMS	Twilio
Rate Limiting	Upstash Redis
Edge Functions	Deno (Supabase Functions)

Design System

Color Palette

Brand -- Wine Red

- Primary base: #8E2A23
- Scale: primary-50 (light rose) -> primary-900 (dark wine)

Semantic Accents (badge/tag colors)

- Mint (success/positive): teal bg + teal text
- Lavender (secondary): purple bg + purple text
- Sage (active): green bg + green text
- Mauve (competition track): pink bg + pink text
- Pale Rose (neutral): warm pink

Semantic Alerts

- Success: #C8EEE2 bg / #0A5A50 text
- Error: #F4D4CE bg / #7A2018 text
- Warning: #FAECD0 bg / #7A4E08 text
- Info: #E0DCF4 bg / #3A3080 text

Admin Portal Colors

Element	Value
Sidebar background	#160C0A (very dark brown)
Sidebar border	#221410
Sidebar text	#B8A8A4 (warm gray)
Sidebar active link	#8E2A23 (wine red)
Page background	#F7F5F2 (warm off-white)
Surface (cards)	#FFFFFF
Border	#DDD9D2
Text primary	#201D18
Text muted	#736D65
Text faint	#9E9890
Table header bg	#8E2A23
Table header text	#FFFFFF

User Portal Colors

Element	Value
Nav background	#160C0A
Surface background	#FDFBF9 (off-white)
Border	#E8DFD8
Text primary	#1A1714

Typography

- Primary: "Jakarta"
- Secondary: "Outfit"
- Fallback: system-ui, ui-sans-serif, sans-serif

Shadows

- shadow-card -- subtle 2px depth
- shadow-elevated -- medium 4px overlay depth
- shadow-dropdown -- deep 8px modal depth

Component Patterns

- Buttons: primary (wine fill), secondary (light fill), destructive (red)
- Inputs: focus ring in primary color, red border + message on error
- Badges: paired bg+text semantic colors
- Cards: border + subtle shadow, group related fields
- Modals: overlay with backdrop blur, fade-in
- Tables: alternating row bg #F7F5F2, wine-red header

Folder Structure

```

app/
??? (user-facing)/      # Public registration portal

```

Admin Portal Pages

Page	Purpose
/admin	Dashboard home
/admin/semesters	List semesters (status, registration count)
/admin/semesters/new	9-step semester creation wizard
/admin/semesters/[id]/edit	Edit existing semester
/admin/classes	Class catalog with search/filter
/admin/sessions	Session table view
/admin/emails	Email broadcast list
/admin/emails/new	4-step email creation flow
/admin/payments	Payment/installment dashboard
/admin/dancers	Dancer database with filters
/admin/families	Family records
/admin/users	User/admin account management
/admin/media	Media library (folder-based)
/admin/credits	Family credit management

/admin/profile	Admin profile + email signature
----------------	---------------------------------

User Portal Pages

Page	Purpose
/	Semester listing with hero + CTA
/semester/[id]	Session grid, add-to-cart, filter bar
/register	5-step registration wizard
/cart	Cart review + checkout
/profile	Account dashboard (registrations, dancers, payments)
/family	Family info + dancer management
/audition	Competition track audition booking

Key Features Already Built

Admin Portal

- 9-step semester editor: Details -> Classes/Sessions -> Session Groups -> Payment Plans -> Discounts -> Registration Form -> Confirmation Email -> Waitlist -> Review/Publish
- TipTap rich text editor: Email-safe output, character limit, live preview, token substitution
- 4-step email broadcast flow: Setup -> Recipients -> Design -> Preview/Schedule
- Email delivery tracking: Per-recipient status via Resend webhooks (opened, clicked, bounced)
- Media library: Folder-based, image + PDF upload, picker modal
- Discount management: Multi-person, multi-session, custom rules with semester linking
- Tuition engine: Division-based progressive discounts, special programs, fee config
- Payment schedule builder: Auto-calculate installments with due dates
- Search + filtering: All major tables (emails, classes, dancers, families)
- Dancer/family database: Relational with linked accounts
- Account credits: Admin-issued family credit management
- PDF attachments: Attachable to forms and emails
- Cron automation: Waitlist processing, scheduled email dispatch, hold expiry

User Portal

- Multi-step registration wizard: 5 steps with sessionStorage persistence
- Shopping cart: 20-minute TTL, expiry countdown, localStorage sync
- Session filtering: By discipline, division, day-of-week
- Dynamic registration form: Admin-configured at runtime with Zod schema generation
- Waitlist system: Position queue, email invitations, 48h acceptance window
- Payment plans: Pay-in-full, deposit, installment options
- Promo codes: Per-family caps, date-based, stackable rules
- Conflict detection: Time overlap validation during registration
- Family accounts: Multi-parent, multi-dancer

Key Data Models

Type	Description
User	Auth user (student, parent, admin) with role
Family	Household grouping users + dancers
Dancer	Child dancer with DOB, gender, registrations
DanceClass	Curriculum entity (discipline, division, competition track)
ClassSession	Time-slot with day, time, capacity, instructor
Registration	Enrollment (dancer -> sessions, status, amount)
WaitlistEntry	Queue entry with position + invite state
Email	Broadcast email (draft/scheduled/sent)
EmailDelivery	Per-recipient delivery event tracking
Discount	Global discount rules
DraftCoupon	Promo code with caps + activation dates

Draft state types (editor-only, in-memory):

- SemesterDraft -- full semester being configured
- DraftClass -- class with nested schedules + requirements
- DraftClassSchedule -- schedule block that generates class_sessions
- DraftTuitionRateBand -- division x weekly count -> base tuition
- DraftClassRequirement -- prerequisite/concurrent/audition/teacher-rec rule

Admin Layout Structure

- Sidebar: 240px wide, dark brown (#160C0A), wine-red active links
- Content area: Warm off-white background (#F7F5F2)
- Page header: Title + breadcrumb via PageHeader component
- Section cards: SectionCard groups related form fields (white bg + border + shadow)
- Tables: Wine-red header, alternating row stripes, action buttons in last column

Multi-step Editor Patterns

Two major multi-step flows exist:

Semester Editor (9 steps) -- /admin/semesters/new

- Details (name, dates, capacity warning)
- Classes (curriculum catalog + nested schedules)
- Session Groups (custom groupings)
- Payment (installment plans + due dates)
- Discounts (link global discount rules)
- Registration Form (drag-drop field builder)
- Confirmation Email (TipTap + token preview)
- Waitlist (enable/configure)
- Review (publish / schedule / save draft)

Email Broadcast Editor (4 steps) -- /admin/emails/new

- Setup (subject, from name, reply-to)
- Recipients (target by semester/session or manual)
- Design (TipTap editor + media attachments + PDF)
- Preview & Schedule (send test, pick send time)

Registration Flow (User Portal)

5-step wizard at /register:

- Email verification (magic link)
- Select participants (dancers in family)
- Dynamic registration form (admin-configured fields)
- Payment (choose plan, enter coupon code, see breakdown)
- Success (confirmation + receipt)

State persisted to sessionStorage per step. Cart TTL is 20 minutes with countdown timer.

Automation (Background)

- pg_cron triggers Supabase Edge Functions every minute
- process-waitlist: Expires 30-min seat holds, expires 48h invitations, invites next in queue
- process-scheduled-emails: Dispatches emails at their scheduled send time
- send-email-broadcast: Batch-sends to all recipients via Resend API

Current Project Phase

The codebase follows a phased rollout:

- Phase 1: Class/session management
- Phase 2: Tuition pricing engine
- Phase 3: Enrollment validation (conflicts, prerequisites)
- Phase 4: Payment + coupon system
- Phase 5: Email/communication system
- Phase 6: Competition track (auditions, invites) -- in progress

Notes for UI Planning

- The admin sidebar is always 240px; content area fills remaining width
- Most admin pages follow: PageHeader -> action bar (search + filters + CTA) -> data table or card grid
- Forms are organized into SectionCard groups, not one long flat form
- Wine red (#8E2A23) is the only primary accent -- use it sparingly for CTAs and active states
- The warm brown/off-white palette should feel "premium but approachable" -- not cold or corporate
- Competition track features use the Mauve badge color to visually distinguish them
- Both portals share the same dark nav (#160C0A) for brand consistency
- Tables always have a wine-red header row -- this is a strong visual signature
- Multi-step flows use a step indicator at the top (numbered, with active/complete states)
